

Quiz Date: 13th February 2020

Q1. A man bought an article for Rs. 648 after getting 2 successive discounts on the marked price of the article of Rs. 840. If the first discount is $14\frac{2}{7}\%$, then find the second discount percentage?

- (a) 8%
- (b) 10%
- (c) 12%
- (d) 15%
- (e) 16%

Q2. If A:B:C =1:3:5 and B:D =4:5 then find A:D?

- (a) 3:25
- (b) 3:5
- (c) 4:15
- (d) 1:15
- (e) 5:16

Q3. A and B alone can do a piece of work in 10 days and 12 days respectively and with the help of C they all together can complete the same work in 4 days, then find in how many days C can complete the same work?

- (a) 10 days
- (b) 12 days
- (c) 15 days
- (d) 13 days
- (e) 8 days

Q4. If A can do $\frac{1}{4}$ th of a work in 12 days and B can complete the $\frac{1}{2}$ th of same work in 8 days, then find in how many days A and B together can complete the 2 times of same work?

- (a) 16 days
- (b) 18 days
- (c) 20 days
- (d) 12 days
- (e) 24 days

Q5. The cost price of the two articles A and B is in the ratio of 3:2. The shopkeeper sold article A at 30% profit and article B at 40% profit. Find the overall profit percent of the shopkeeper?

- (a) 32%
- (b) 36%
- (c) 38%
- (d) 34%
- (e) 30%

Q6. Veer covers a certain distance in a certain time. If he increases his speed by 10 kmph then he reached at the destination 2 hours before but when decreased by 10 kmph, time taken by Veer increased by 3 hours. Find out the certain distance?

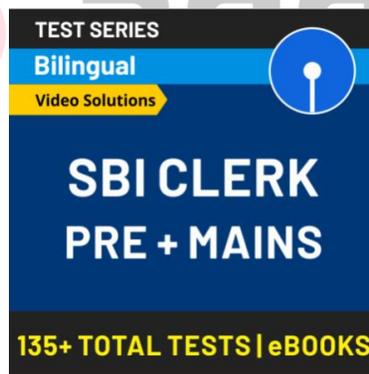

- (a) 500km
- (b) 480km
- (c) 600km
- (d) 720km
- (e) 640km

Q7. Veer invested one third of his total investment at 6% and remaining investment at the rate of 9% for one year and received total interest of Rs.960. find the total sum invested by veer?

- (a) Rs. 10,000
- (b) Rs. 14,000
- (c) Rs. 12,000
- (d) Rs. 16,000
- (e) Rs. 18,000

Q8. Present ages of Veer and Vedanta is in the ratio of 2:3, 8 years hence the ratio becomes 18:25, then find out the ratio of ages of Veer and Vedanta 4 years ago?

- (a) 10:17
- (b) 13:17
- (c) 15:17
- (d) 16:23
- (e) 12:19

Q9. A boat can cover a certain distance of 180 km and come back in 12.5 hours. If the ratio of speed of boat in still water is in the ratio of 5:1, then find out the speed of boat in still water (in km/h)?

- (a) 25 km/h
- (b) 28 km/h
- (c) 30 km/h
- (d) 26 km/h
- (e) 32 km/h

Q10. Deepak can row 18 kmph in still water and he covers twice distance in downstream as much as that of upstream in same time. Find the speed of current.

- (a) 5 kmph
- (b) 8 kmph
- (c) 6 kmph
- (d) 4 kmph
- (e) 3 kmph

Q11. Two letters are chosen out of the alphabets from the English language. Find out the probability that both the letters are consonant?

- (a) $\frac{2}{3}$
- (b) $\frac{12}{65}$
- (c) $\frac{5}{6}$
- (d) $\frac{42}{65}$
- (e) $\frac{8}{9}$

Q12. If the simple interest on a certain sum of money for 4 years at 3% per annum is same as the simple interest on Rs. 640 for 3 years at 6% per annum, then find the sum of money?

- (a) Rs. 960
- (b) Rs. 640
- (c) Rs. 800
- (d) Rs. 840
- (e) Rs. 720

Q13. A, B and C were sharing profits in the ratio of 3:6:7. If time taken by A, B and C in the partnership is in the ratio of 2:3:2 and capital taken by B be Rs.4800, then find out the capital share of A?

- (a) Rs. 3200
- (b) Rs. 3600
- (c) Rs. 3800
- (d) Rs. 4200
- (e) Rs. 3000

Q14. The average speed of a school bus is 72 km/h excluding its stoppage time and if stoppage time is included its average become 60km/hr. How many minutes does the school bus stop in an hour?

- (a) 12 min
- (b) 18 min
- (c) 16 min
- (d) 14 min
- (e) 10 min

Q15. Mohit invested Rs. 6000 in a scheme offering simple interest for two years. At the rate of interest for first year and second year is 10% and 12% per annum respectively. Find the interest earned by him.

- (a) Rs. 1320
- (b) Rs. 1220
- (c) Rs. 1680
- (d) Rs. 1570
- (e) Rs. 1380

Solutions

S1. Ans. (b)

Sol.

Let second discount be r%.

ATQ

$$840 \times \frac{6}{7} \times \frac{100-r}{100} = 648$$

So, r = 10%

S2. Ans. (c)

Sol.

$$A:B = 1:3$$

$$\text{And } B:D = 4:5$$

$$A:B:D = 4:12:15$$

$$\text{So, } A:D = 4:15$$

S3. Ans. (c)

Sol.

$$1 \text{ day efficiency of A} = \frac{1}{10} \text{ unit}$$

$$1 \text{ day efficiency of B} = \frac{1}{12} \text{ unit}$$

$$\text{And 1 day efficiency of A, B and C together} = \frac{1}{4} \text{ unit}$$

$$\text{So, 1 day efficiency of C} = \frac{1}{4} - \frac{1}{10} - \frac{1}{12} = \frac{1}{15} \text{ unit}$$

Required time = 15 days.

S4. Ans. (e)

Sol.

$$1 \text{ day efficiency of A} = \frac{1}{48} \text{ unit}$$

$$1 \text{ day efficiency of B} = \frac{1}{16} \text{ unit}$$

$$\text{So, 1 day efficiency of A and B together} = \frac{1}{48} + \frac{1}{16} = \frac{1}{12}$$

$$\text{So, required time} = 2 \times 12 = 24 \text{ days.}$$

S5. Ans. (d)

Sol.

Let cost price of the article A and B be Rs. $300x$ and Rs. $200x$ respectively.

ATQ,

Selling price of the article A and B be Rs. $390x$ and Rs. $280x$.

$$\begin{aligned} \text{Required percentage} &= \frac{390x + 280x - 300x - 200x}{300x + 200x} \times 100 \\ &= 34\% \end{aligned}$$

S6. Ans. (c)

Sol.

Let speed of veer = s kmph

ATQ,

$$\frac{s(s+10)}{10} \times 2 = \frac{s(s-10)}{10} \times 3$$

$$S = 50 \text{ kmph}$$

$$\text{Distance} = \frac{50 \times 60}{10} \times 2 = 600 \text{ km.}$$

S7. Ans. (c)

Sol.

Let investment = Rs. X

ATQ,

$$\frac{x}{3} \times \frac{6}{100} + \frac{2x}{3} \times \frac{9}{100} = 960$$

$$X = \text{Rs. } 12,000$$

S8. Ans. (e)

Sol.

Let present ages of Veer and Vedanta be $2x$ and $3x$ years respectively.

ATQ,

$$\frac{2x+8}{3x+8} = \frac{18}{25}$$

$$x = 14$$

$$\begin{aligned} \text{required ratio} &= 28 - 4 : 42 - 4 \\ &= 24 : 38 \\ &= 12 : 19 \end{aligned}$$

S9. Ans. (c)

Sol.

Let speed of boat in still water and speed of stream be $5x$ and x km/h respectively.

$$\frac{180}{6x} + \frac{180}{4x} = 12.5$$

$$x = 6$$

so, speed of boat = 30 km/h.

S10. Ans. (c)

Sol.

Let distance = D km

And speed of current = x kmph

ATQ,

$$\frac{D}{18-x} = \frac{2D}{18+x}$$

On solving the equations

$$x = 6$$

S11. Ans. (d)

Sol.

Sample for both letters to be consonants.

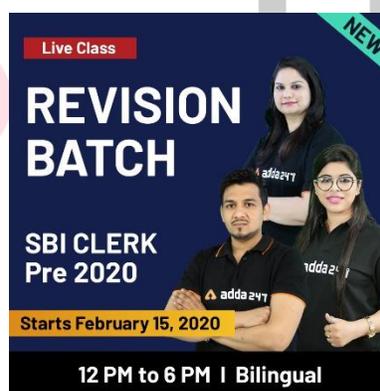

$$= {}^{21}C_2 = 210$$

Total sample for two letters

$$= {}^{26}C_2 = 325$$

$$\text{Required probability} = \frac{210}{325} = \frac{42}{65}$$

BANKERS

S12. Ans. (a)

Sol.

Let the sum be Rs. P .

ATQ,

$$\frac{P \times 3 \times 4}{100} = \frac{640 \times 6 \times 3}{100}$$

$$P = \text{Rs. } 960$$

S13. Ans. (b)

Sol.

ATQ,

Capital	A	B	C
Time	2	3	2

.....
Profit 3 6 7

So, A: B: C = 3: 4: 7

Since, Capital of B = Rs.4800

So, A's capital = $\frac{4800}{4} \times 3 = \text{Rs. } 3600$

S14. Ans. (e)

Sol.

ATQ,

Required time = $\frac{72-60}{72} \times 60 = 10 \text{ min}$

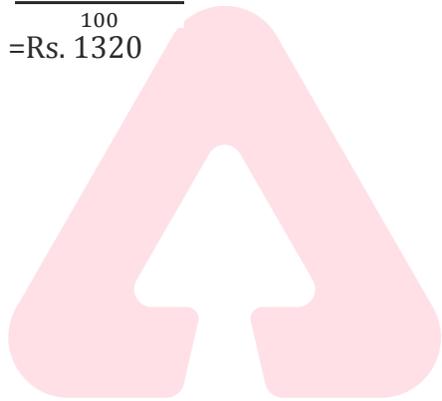

S15. Ans. (a)

Sol.

ATQ,

$\frac{60000 \times (10+12)}{100}$

=Rs. 1320
