Directions (1-5): **Study the following information carefully to answer the given questions.**

Eight persons A, B, C, D, E, F, G and H are seated in a straight line but not necessarily in the same order. Some of them are facing south while some are facing north. There are two persons sitting between the person who like potato and the one who likes beans.

Immediate neighbours of E face opposite directions (i.e. if one neighbour of E faces North then the other faces South and vice-versa). G sits second to the left of A who does not like cucumber and beans. A is not an immediate neighbour of H. The person who sits second to the right of H likes tomato. Neither A nor F sits at the extreme end of the line. Both the immediate neighbours of F face north. D sits to the immediate left of B. The persons sitting at the extreme end of the row like neither green chilli nor carrot. Immediate neighbours of G face opposite directions. People sitting at the extreme ends face the opposite directions. H who faces south does not like carrot. H sits fourth to left of C who likes lemon. C sits at one of the extreme ends of the line. Both the immediate neighbours of H face north and they like potato and cabbage.
