

Quiz Date: 10th May 2020

Direction (1-5): Study the following information carefully to answer the given questions.

Seven persons are living in seven different floors of building. One of the floors in the building is vacant. Ground floor is numbered one, and the topmost floor is numbered eight. Each of them went for vacation on different months of the year starting from January to July (but not necessarily in the same order).

C went for vacation before A. The one who went on April lives immediately below F. E lives on an odd numbered floor above fourth floor. Only three persons live between G and the vacant floor. There are only three floors between C and the one who went on June. The one who went on February live on one of the floors below fourth floor. There are only four floors between F and A. The person who went on July lives immediately below the person who went on January. The person who lives immediately below the vacant floor went on February. Only two floors are there between the persons who went on January and June. B lives immediately below the vacant floor. The number of floors between E and C is the same as the number of persons living above E. B lives on the floor which is immediately above the one who went on May. There is only one floor between E and the one who went on February. A went for vacation before F. D lives below G.
