Directions (1-5): **Study the following information carefully and answer the question given below:**

Seven boxes labeled as A, B, C, D, E, F and G are kept one above the other but not necessarily in the same order. Each of them contains a different food item viz. Onion, Potato, Cabbage, Carrot, Capsicum, Brinjal and Tomato, but not necessarily in the same order.

Only one box is there between the box which contains Tomato and the box which contains Brinjal. Box E is not kept at the lowermost position. There are only six boxes below the box which contains onion. Only three boxes are there between box E and box B. Box D is kept somewhere above box C. The box which contains carrot is kept somewhere below box F. More than five boxes are kept above the box which contains Carrot. Cabbage is not kept in box A. Box G does not contains Carrot. Box F is kept immediately below box A. Tomato is not kept in box D. Box G does not contain onion. Box E is kept somewhere below box B. Only two boxes are there between the box which contains Cabbage and box G. Boxes which contains potato and cabbage are adjacent to each other. The box which is kept immediately above box G contains Capsicum. Only one box is kept between box B and the box which contains Cabbage. Box E and the box which contains brinjal are kept adjacent to each other.
