S55. Ans.(a)

Sol. Clearly, number of students in the class =  $(14 + 32 - 1) = 45$ .

S56. Ans.(b)

Sol. Number of boys who passed =  $(21 + 11 - 1) = 31$ .  
 $\therefore$  Total number of boys in the class =  $(31 + 10 + 3) = 44$ .

S57. Ans.(a)

Sol. Clearly, A is 13th from the right and B is 11th from the right end and 10th from the left end of the row

So, number of boys in the row =  $(11 - 1 + 10) = 20$

Now, A is 13th from the right

Number of boys to the left of A =  $(21 - 13) = 8$

Hence, A is 8th from the left end of the row.
